

The present invention relates to a coating composition comprising a polyunsaturated polymer, a thiol compound, and a photo-initiator.

*A*<sup>2</sup>  
BACKGROUND OF THE INVENTION-

Page 1, please change lines 18-24 to read as follows:

*A*<sup>3</sup>  
-SUMMARY OF THE INVENTION

The object of the invention is a coating composition according to the opening paragraph, which is free of the above mentioned drawbacks. Furthermore, the coating composition should show fast curing at low temperatures on the one hand and sufficiently long shelf life, especially for one-pot systems, on the other.

*A*<sup>4</sup>  
DETAILED DESCRIPTION OF THE INVENTION

The object of the invention is achieved by a coating composition comprising:

- a. one or more thiol compounds;- -

IN THE CLAIMS:

Please amend claims 2-10 to read as follows:

- A*<sup>4</sup>  
2. (Amended) Coating composition according to claim 1, wherein the ratio between the number of unsaturated groups and the number of SH-functional groups is at least 1.5:1.
3. (Amended) Coating composition according to claim 1, wherein the coating composition comprises 1 - 30 wt.% of thiol compounds, related to the total weight of solid resin.
